## SUMMARY

Software Developer with over 3 years of expertise in full-stack development and automation testing. Demonstrated success in collaborating with multinational clients like Manulife Financial Corporation, where automation strategies were implemented to execute approximately 35 complex test cases daily. Currently focused on optimizing HRIS backend architecture and delivering high-quality feature enhancements within strict 11-day sprint cycles, utilizing Angular and Apollo Client (GraphQL) to drive system efficiency.

---

## EDUCATION

**Parahyangan Catholic University | Informatics Engineering | GPA: 2.75/4.00**

*Aug 2017 - Nov 2022*

**2 Achievements:**

---

## EXPERIENCE

**Fullstack Developer | Andal Software**

*Dec 2024 - Present*

- Integrated backend APIs via Apollo Client (GraphQL) to manage complex employee transaction and attendance data, ensuring seamless synchronization between the server and the frontend interface for clients in the Food and Clothing industries.
- Engineered complex business logic for dynamic components, such as conditional calendars and payroll lists, effectively handling master data filtering and specific validation rules within the Angular framework.
- Resolved critical backend-integrated validation issues and optimized data rendering logic within strict 11-day sprint cycles, significantly improving system stability and data integrity for the HRIS platform.

**QA Engineer | Kinara Digital Studio**

*Sept 2023 - Dec 2024*

- Developed and maintained robust automation frameworks using Java, Playwright, and Cucumber Gherkin, successfully executing and validating approximately 35 complex test cases per day for insurance products.
- Implemented advanced data handling features, such as reading external data from Excel, and refactored automation flows to cover end-to-end scenarios, enhancing the efficiency and coverage of the testing suite.
- Updated and synchronized automation rules to align with third-party service integrations like MetaMorphoSys, ensuring accurate reporting to the QA team despite frequent UI and system updates.

**Web Developer | PT.Transindo Citra Express**

*Jul - Oct 2020*

- Developed secure backend authentication modules for user registration and login using the CodeIgniter 3 framework, ensuring controlled and secure access for client data.
  - Programmed server-side logic to generate dynamic QR codes and PDF invoices, facilitating automated tracking and efficient reporting for logistics transactions.
  - Constructed efficient CRUD operations and master data management views, enabling the administration team to effectively manage shipping logs and client databases.
- 

## CERTIFICATION

**Fundamental SQL Using SELECT Statement | DQLab**

*2022*

**SQL and Relational Databases 101 | Cognitive Class**

*2022*
